Larry Aumiller is a wildlife photographer and naturalist who has spent the last three decades studying and photographing the brown bears of McNeil River, Alaska. Through his stunning images and intimate observations, Aumiller has captured the essence of these magnificent creatures, revealing their complex social dynamics, hunting strategies, and the challenges they face in a rapidly changing world.

Aumiller's work has been featured in numerous exhibitions and publications, including National Geographic, the BBC, and the Smithsonian Institution. He has also authored several books on brown bears, including "In the Realm of Brown Bears" and "The Brown Bears of McNeil River."

Aumiller's Early Years

Aumiller was born in Ohio in 1954. He developed a love of nature at a young age, and he began photographing wildlife in his early teens. After graduating from high school, Aumiller attended the University of Alaska Fairbanks, where he studied wildlife biology.

In 1977, Aumiller traveled to McNeil River for the first time. He was immediately captivated by the beauty of the river and the abundance of brown bears. Aumiller spent the next several summers at McNeil River, photographing the bears and learning about their behavior.

Aumiller's Photography

Aumiller's photographs of brown bears are renowned for their intimacy and authenticity. He often spends hours observing the bears, waiting for the perfect moment to capture their behavior on film. Aumiller's images are not only beautiful, but they also provide valuable insights into the lives of these amazing animals.

Aumiller's Research

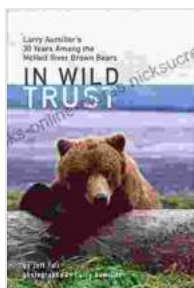

In addition to his photography, Aumiller has also conducted extensive research on brown bears. He has published numerous scientific papers on bear behavior, ecology, and conservation. Aumiller's research has helped to

shed light on the complex lives of these animals and the challenges they face in a rapidly changing world.

Aumiller's Conservation Work

Aumiller is a passionate advocate for brown bear conservation. He has worked tirelessly to protect the McNeil River brown bear population from threats such as habitat loss, hunting, and climate change. Aumiller's work has helped to ensure that future generations will be able to enjoy the beauty and wonder of these amazing animals.

Larry Aumiller is one of the world's leading experts on brown bears. Through his stunning photography, intimate observations, and groundbreaking research, he has helped us to understand and appreciate these magnificent creatures. Aumiller's work is a testament to the power of nature and the importance of conservation.
