In Live Well Die Broke, Walker challenges the traditional wisdom about money. He argues that we don't need to save for a big nest egg in order to retire comfortably. In fact, he says that we should spend our money now, while we're young and healthy. This may sound counterintuitive, but Walker provides the data and evidence to back up his claims.

Walker's philosophy is based on the idea that we should live our lives to the fullest. He believes that we should spend our money on experiences that we enjoy, rather than saving it for a future that may never come.

Of course, there are some caveats to Walker's philosophy. He doesn't advocate spending all of your money without any thought for the future. He simply says that we should focus on living our lives now, rather than worrying about saving for retirement.

If you're looking for a financial guide that will change your life, then you need to read *Live Well Die Broke*. Walker's philosophy is simple, but it's incredibly powerful. If you follow his advice, you'll be on your way to living a more fulfilling life, free from financial worry.
