Kellow argues that long-form journalism is essential for a healthy democracy. It allows for a more nuanced and in-depth examination of complex issues than is possible in shorter formats. It also provides a platform for voices that might not otherwise be heard.

But on college campuses today, long-form journalism is in decline. Kellow attributes this to a number of factors, including the rise of social media, the decline of print media, and the increasing corporatization of higher education.

The decline of long-form journalism has had a profound impact on campus discourse. Kellow argues that it has led to a more polarized and less informed student body. Students are more likely to get their news from social media, which is often echo chambers that reinforce their existing beliefs.

The decline of long-form journalism has also made it more difficult for students to engage in critical thinking. Long-form journalism requires readers to slow down and think deeply about the issues at hand. It also encourages readers to consider multiple perspectives.

Kellow concludes his book with a call for a renewed commitment to long-form journalism on college campuses. He argues that long-form journalism is essential for a healthy democracy and that it is the responsibility of colleges and universities to support it.

The Importance of Long-Form Journalism

Long-form journalism is a type of journalism that is typically longer than 2,500 words. It is often more in-depth and nuanced than shorter formats of journalism, and it allows for a more thorough examination of complex issues.

Long-form journalism is important for a number of reasons. First, it allows for a more in-depth examination of complex issues. Shorter formats of journalism, such as news articles and blog posts, are often limited in their ability to provide context and background information. Long-form journalism can provide a more comprehensive understanding of an issue, and it can help readers to make more informed decisions.

Second, long-form journalism provides a platform for voices that might not otherwise be heard. Shorter formats of journalism often focus on the most sensational or controversial aspects of a story, and they may not give equal time to all sides of an issue. Long-form journalism can provide a more nuanced and balanced perspective, and it can help to give a voice to those who are often marginalized.

Third, long-form journalism encourages critical thinking. Shorter formats of journalism often provide readers with a ready-made interpretation of the news. Long-form journalism, on the other hand, requires readers to slow down and think deeply about the issues at hand. It also encourages readers to consider multiple perspectives, and it can help to foster a more nuanced understanding of the world.

The Decline of Long-Form Journalism on College Campuses

Long-form journalism is in decline on college campuses for a number of reasons. First, the rise of social media has led to a decline in the consumption of traditional print media. Social media is often a more convenient and 手軽な way to get news, and it can be more tailored to individual interests.

Second, the decline of print media has led to a decline in the number of jobs for long-form journalists. Many newspapers and magazines have downsized or closed in recent years, and this has made it more difficult for long-form journalists to find work.

Third, the increasing corporatization of higher education has led to a decline in the support for long-form journalism on college campuses. Colleges and universities are increasingly focused on generating revenue,

and they are less likely to support programs that are not seen as directly contributing to .

The Impact of the Decline of Long-Form Journalism on Campus Discourse

The decline of long-form journalism on college campuses has had a profound impact on campus discourse. First, it has led to a more polarized and less informed student body. Students are more likely to get their news from social media, which is often echo chambers that reinforce their existing beliefs.

Second, the decline of long-form journalism has made it more difficult for students to engage in critical thinking. Long-form journalism requires readers to slow down and think deeply about the issues at hand. It also encourages readers to consider multiple perspectives, and it can help to foster a more nuanced understanding of the world.

Third, the decline of long-form journalism has made it more difficult for students to have their voices heard. Long-form journalism provides a platform for voices that might not otherwise be heard. But with the decline of long-form journalism, students are less likely to have the opportunity to share their stories and perspectives.

A Call for a Renewed Commitment to Long-Form Journalism on College Campuses

Kellow concludes his book with a call for a renewed commitment to long-form journalism on college campuses. He argues that long-form journalism is essential for a healthy democracy and that it is the responsibility of colleges and universities to support it.

There are a number of ways that colleges and universities can support long-form journalism. One way is to provide financial support to student newspapers and magazines. Another way is to create more opportunities for students to learn about and practice long-form journalism. Finally, colleges and universities can create a more supportive environment for long-form journalism by encouraging faculty to write and publish long-form articles and by creating a culture of open and respectful dialogue.

Long-form journalism is a vital part of a healthy democracy. It provides a platform for voices that might not otherwise be heard, and it encourages critical thinking. The decline of long-form journalism on college campuses is a serious problem, and it is one that we must address if we want to have a healthy and informed society.
