Jobs was born in San Francisco in 1955. He was adopted by Paul and Clara Jobs, a working-class couple. Jobs showed an early interest in electronics and technology. He built his first computer in his parents' garage when he was just 12 years old.

In 1976, Jobs co-founded Apple with Steve Wozniak. The company's first product was the Apple II, which was a huge success. Jobs followed up with the Macintosh in 1984, which was the first commercially successful personal computer with a graphical user interface.

Jobs was forced out of Apple in 1985 following a power struggle with the company's board of directors. He went on to found NeXT, a computer company that developed the NeXTSTEP operating system. In 1997, Apple acquired NeXT and Jobs returned to the company as CEO.

Under Jobs' leadership, Apple went on to release a string of successful products, including the iPod, iPhone, and iPad. Jobs stepped down as CEO in 2011 due to health problems. He died in 2011 at the age of 56.

Jobs was a brilliant innovator and a master marketer. He had a unique ability to see the future and to create products that people loved. He was also a demanding and difficult boss, but he was also fiercely loyal to his employees.

Jobs' legacy is complex and controversial. He was a visionary leader who changed the world, but he was also a flawed human being. He was a brilliant innovator, but he was also a ruthless businessman. He was a demanding boss, but he was also a loyal friend.

Despite his flaws, Jobs' legacy is secure. He was one of the most influential figures in the tech industry and he left an enduring mark on the world.

## **Early Life and Education**

Steve Jobs was born on February 24, 1955, in San Francisco, California. He was adopted by Paul and Clara Jobs, a working-class couple. Jobs showed an early interest in electronics and technology. He built his first computer in his parents' garage when he was just 12 years old.

Jobs attended Homestead High School in Cupertino, California. He was a bright student, but he was also a rebel. He often skipped school to hang out with friends and work on his electronics projects.

After graduating from high school, Jobs enrolled at Reed College in Portland, Oregon. He dropped out after six months, however, because he felt that he was not getting enough out of his education.

## **Career**

After dropping out of Reed College, Jobs returned to California and began working for Atari, a video game company. In 1976, he co-founded Apple with Steve Wozniak. The company's first product was the Apple II, which was a huge success.

Jobs followed up with the Macintosh in 1984, which was the first commercially successful personal computer with a graphical user interface. Jobs was forced out of Apple in 1985 following a power struggle with the company's board of directors.

He went on to found NeXT, a computer company that developed the NeXTSTEP operating system. In 1997, Apple acquired NeXT and Jobs returned to the company as CEO.

Under Jobs' leadership, Apple went on to release a string of successful products, including the iPod, iPhone, and iPad. Jobs stepped down as CEO in 2011 due to health problems. He died in 2011 at the age of 56.

## **Legacy**

Steve Jobs was a brilliant innovator and a master marketer. He had a unique ability to see the future and to create products that people loved. He was also a demanding and difficult boss, but he was also fiercely loyal to his employees.

Jobs' legacy is complex and controversial. He was a visionary leader who changed the world, but he was also a flawed human being. He was a brilliant innovator, but he was also a ruthless businessman. He was a demanding boss, but he was also a loyal friend.

Despite his flaws, Jobs' legacy is secure. He was one of the most influential figures in the tech industry and he left an enduring mark on the world.
