

The Bonus System Includes His Personal Indicators In MT4, MT5, and TradingView

The bonus system is a trading system that includes a variety of indicators and educational resources to help traders identify trading opportunities and make informed decisions. The system was developed by John Smith, a professional trader with over 20 years of experience.

Smith's personal indicators are designed to identify trends, momentum, and support and resistance levels. The indicators are available for use on the MT4, MT5, and TradingView platforms.

In addition to the indicators, the bonus system also includes a variety of educational resources. These resources include articles, videos, and webinars that cover a wide range of trading topics.

Forex Trading: The Basics Explained in Simple Terms (Bonus System incl. videos): The Bonus System includes his personal indicators in MT4/MT5 and TradingView ... Stocks, Currency Trading, Bitcoin Book

The bonus system is a valuable resource for traders of all levels of experience. The indicators and educational resources can help traders improve their trading skills and make more informed decisions.

The bonus system includes a variety of indicators that are designed to help traders identify trading opportunities and make informed decisions. The indicators are divided into three categories:

- **Trend indicators** identify the overall trend of the market.
- **Momentum indicators** measure the strength of the trend.
- **Support and resistance indicators** identify areas where the price is likely to bounce or reverse.

The trend indicators included in the bonus system are:

- **Moving averages** are a simple but effective way to identify the trend of the market.
- **Exponential moving averages** are a more responsive type of moving average that can help traders identify trends more quickly.
- **Parabolic SAR** is a technical indicator that identifies potential trend reversals.

The momentum indicators included in the bonus system are:

- **Relative strength index (RSI)** is a momentum indicator that measures the strength of the trend.
- **Stochastic oscillator** is a momentum indicator that measures the overbought and oversold conditions of the market.
- **MACD** is a momentum indicator that measures the difference between two moving averages.

The support and resistance indicators included in the bonus system are:

- **Support and resistance levels** are areas where the price is likely to bounce or reverse.
- **Fibonacci retracements** are a technical indicator that identifies potential support and resistance levels.
- **Pivot points** are a technical indicator that identifies potential support and resistance levels.

In addition to the indicators, the bonus system also includes a variety of educational resources. These resources include articles, videos, and webinars that cover a wide range of trading topics.

The educational resources included in the bonus system are:

- **Articles** cover a variety of trading topics, including technical analysis, fundamental analysis, and risk management.
- **Videos** provide a visual explanation of trading concepts.
- **Webinars** are live online events that allow traders to learn from experienced traders.

The educational resources included in the bonus system are a valuable resource for traders of all levels of experience. The resources can help traders improve their trading skills and make more informed decisions.

The bonus system is a valuable resource for traders of all levels of experience. The indicators and educational resources can help traders improve their trading skills and make more informed decisions.

If you are looking for a trading system that can help you identify trading opportunities and make informed decisions, then the bonus system is a great option.
