The Tradingview script is now included in the download package for Forex Forex Trading. This script allows you to create and share your own trading strategies, and it can be used to automate your trading.

What is the Tradingview script?

The Tradingview script is a powerful tool that allows you to create and share your own trading strategies. It is a visual programming language that makes it easy to create complex trading strategies, even if you don't have any programming experience.

The Tradingview script can be used to create a wide variety of trading strategies, including:

- Trend following strategies
- Momentum strategies
- Reversal strategies
- Range trading strategies
- Breakout strategies

How to use the Tradingview script

To use the Tradingview script, you will need to create a Tradingview account. Once you have created an account, you can start creating your own trading strategies.

To create a new trading strategy, click on the "Create" button in the top right corner of the Tradingview screen. This will open the Tradingview Strategy Editor.

In the Strategy Editor, you can drag and drop indicators and other objects onto the chart to create your trading strategy. You can also use the Tradingview script to create your own custom indicators and objects.

Once you have created your trading strategy, you can test it on historical data to see how it performs. You can also share your trading strategy with other Tradingview users.

How to automate your trading with the Tradingview script

The Tradingview script can be used to automate your trading. To do this, you will need to create a Tradingview bot.

A Tradingview bot is a program that can automatically execute trades based on your trading strategy. Tradingview bots can be used to trade a variety of assets, including forex, stocks, and cryptocurrencies.

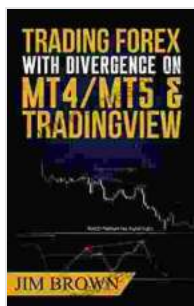

To create a Tradingview bot, you will need to use the Tradingview Script Editor. In the Script Editor, you can create a script that defines your trading strategy. You can also use the Script Editor to create custom indicators and objects.

Once you have created your trading bot, you can deploy it to the Tradingview platform. Tradingview bots can be deployed to the cloud or to a local computer.

The Tradingview script is a powerful tool that can help you to improve your trading. It can be used to create and share your own trading strategies, and it can be used to automate your trading.

If you are interested in learning more about the Tradingview script, I encourage you to visit the Tradingview website.

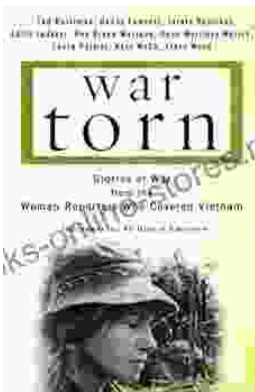

Thank you for reading!
